Driven Junior Developer seeking opportunities to apply and enhance my skills in a dynamic setting. Adaptable and eager for growth, I'm dedicated to contributing positively to team culture and delivering value. Passionate about embracing new challenges and fostering innovation.

TECHNICAL SKILLS

HTML

CSS

JavaScript/TypeScript

React

Tailwind

JIRA

SQL

Git

TDD (Test Driven Development)

Deluge (Scripting Language)

Zoho One (Customer Management System)

PROJECTS

Backend news API

<https://github.com/RGBlife/news-api>

- A MVC-designed news hub using Node.js with Express, and PostgreSQL. Automating deployment with CI/CD. Following TDD practice during development

React news app

<https://github.com/RGBlife/news-api-ui>

- Developed a responsive and user-friendly CRUD application using React for news aggregation and discussion. Implemented features like article browsing, commenting, voting

Bubbly chat app

<https://github.com/RGBlife/bubbly>

- Used Socket.io to handle real-time messaging, allowing messages to be exchanged instantaneously between users

EDUCATION

Sussex Downs College

(2010 – 2014)

BTEC Diploma & A Levels:

ICT Diploma Level 2

BTEC Business Level 3

AAT Accountancy Level 4

AAT Accountancy Level 3

AAT Accountancy Level 2

EXPERIENCE

Junior Full Stack Developer

(Aug 2023 – Nov 2023)

Northcoders Software Development Bootcamp

- Acquired a strong foundation in programming fundamentals, emphasising test-driven development, pair programming, and object-oriented programming using JavaScript
- Gained proficiency in back-end technologies, including building servers with Express, SQL database management, and RESTful API design and testing
- Built a foundational understanding of front-end web development, focusing on semantic HTML, responsive CSS, and the React framework
- Engaged in a hands-on project phase, working collaboratively on real-world challenges, exploring a diverse range of technologies
- Benefitted from a comprehensive curriculum that incorporated best practices and simulated real-world tech team environments

Junior Developer

(Aug 2022 – Aug 2023)

Goldstar IT Consultancy

- Led the configuration and deployment of automation scripts for projects, aligning with business requirements. Notably delivered a script ticketing system for a Cyber Security Company ahead of a tight deadline
- Managed the consolidation and migration of data from legacy systems while deploying essential business reports
- Successfully merged two modules for a Manufacturing of Physical Security and Shading Solutions, ensuring data integrity and enhancing workflow efficiency
- Developed comprehensive documentation, both written and video-based, fostering improved stakeholder understanding. This proficiency was key in providing post-implementation training and effectively communicating technical concepts
- Demonstrated expertise in REST API, SQL, and coding within the Zoho ecosystem
- Coded scripts to enhance customer interaction, data management, and sales operations

Client Onboarding Executive

(Nov 2017 – Aug 2022)

Posturite

- Worked closely with developers and stakeholders to complete comprehensive testing of a new e-commerce website
- Identified, documented and reported bugs that resulted in migrating to a new payment provider, generating cost savings
- Attained a 70% conversion rate in converting onboarded clients to make their first online order

(Additional work experience available upon request)
